

FEP-100

CHARACTER

- As a preservative in personal care formulations.
- As an intermediate for bactericidal agents
- As a perfume fixative
- As a solvent in printing inks and an emulsifier to help lower interfacial tension in oil-water emulsions
- As an ingredient in slurring compounds used to protect metals against corrosion
- Excellent stability and low toxicity
- Solvent for dyes in textile and leather finishing
- Agricultural formulation

APPLICATION

- preservatives in personal care products including detergents, cosmetics, toiletries and pharmaceuticals

COMPOSITION

- Ethylene glycol monophenyl ether & Ethylhexylglycerin

SPECIFICATION

Appearance (Visual)	Colorless Clear Liquid
Color (APHA)	10 Max
Moisture(%)	0.5 Max
Specific Gravity (20°C)	1.090 ± 0.02
Odour	Characteristic

PACKAGE

- 200kg drum, 15kg Can / 20KG PE Pail drum

SHELF LIFE AND STORAGE CONDITION

- 24 months from the date of manufacture (Original packing state, room temperature)

SAFETY AND HANDLING

- Consult the Material Safety Data Sheet (MSDS) available from FTC KOREA
