RE: Application No. 2025-13884

Dear Ju Young,

The International Cosmetic Ingredient Nomenclature Committee (INC) has completed its review of the INCI application referenced above. Based on information provided in the application, the INCI name assignment is detailed in the attachment to this letter.

Please be aware that the designation of an INCI name for a cosmetic ingredient is an essential part of ingredient identification; however, it does not mean that the ingredient has been approved for use in cosmetics. The assignment of an INCI name to an ingredient does not imply that the ingredient is safe, has been certified, or that its use complies with the laws and regulations of the United States or other global regions. The safety and appropriate use of an ingredient, along with regulatory considerations, should be carefully evaluated by the manufacturer as part of the development process before a product is marketed.

Please note, the attachment lists information from your application as it appears in our data base and will be published in the *International Cosmetic Ingredient Dictionary and Handbook*, the web-based Dictionary *wINCI*, and the Council's *On-Line INFOBASE*. If your application indicates the trade name is "not for publication," it is noted on the attachment and the data will not be published.

The INCI name assignment and related company information will be retained in our data base unless we are notified that the product is no longer manufactured. You will be contacted on an approximate annual basis to update the status of your company listings. This communication will include only trade names and addresses; therefore, it is imperative that you maintain accurate records of all INCI name assignments.

In addition, please be advised that INCI names are continually reviewed by the INC for accuracy and may be subject to change when deemed necessary. Decisions to make such changes are within the sole discretion of the INC.

Should you have any questions, please do not hesitate to contact me for further information.

Best regards,

A handwritten signature in blue ink that reads "Joanne M. Nikitakis".
